

Faster, Easier, Cheaper with More Applications Available

Expand As Required

The HiRes Starter will get you up and printing quickly with the essential elements required for screen printing - StencilPro film, exposure accessories, frames, squeegee and instructions - just add your own ink suitable for your printing application.

High Resolution Prints

StencilPro HiRes film is a 200Mesh grade for ultra fine lines, text, graphics and prints onto glass, metals, plastics and non-absorbent materials.

No Emulsion Coating

With EZIscreen there is no coating emulsions, simply expose your designs instantly under sunlight = faster, easier and cheaper.

Right Equipment First Time

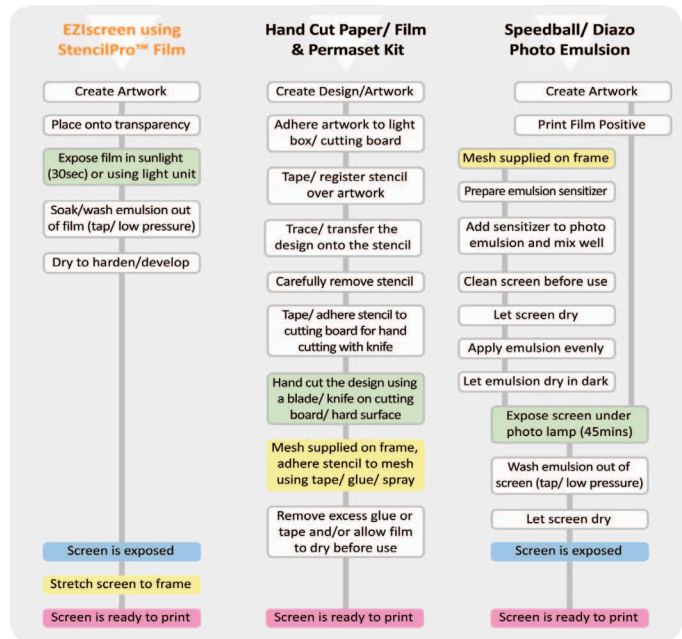

High resolution screens combined with equipment and supplies for printing 'off contact' ensures clear sharp prints straight away.

Do other kits provide you table adhesive and height adjusters for true off contact printing onto non-absorbent materials? Unlike other brands of 'starter' kits, EZIscreen gives you the right equipment, all the hints, all the tips and all the trade secrets straight away, no more items to buy.

Pack specifications

• See website for specification details
