

Faster, Easier, Cheaper with More Applications Available

Start Small and Expand As Required

The Basic Starter will get you up and printing quickly with the essential elements required for screen printing - StencilPro film, exposure accessories, frames, squeegee, inks and instructions.

Stencil or Screen Print

Using StencilPro film you can use the film loose and stencil, or attach to a frame for screen printing applications.

Versatile and easy to use - swap your design between multiple applications as required. No need to make a new screen for each use, just mount to a frame, or remove from the frame as and when it's needed.

No Emulsion Coating

With EZIscreen there is no coating emulsions, simply expose your designs instantly under sunlight = faster, easier and cheaper.

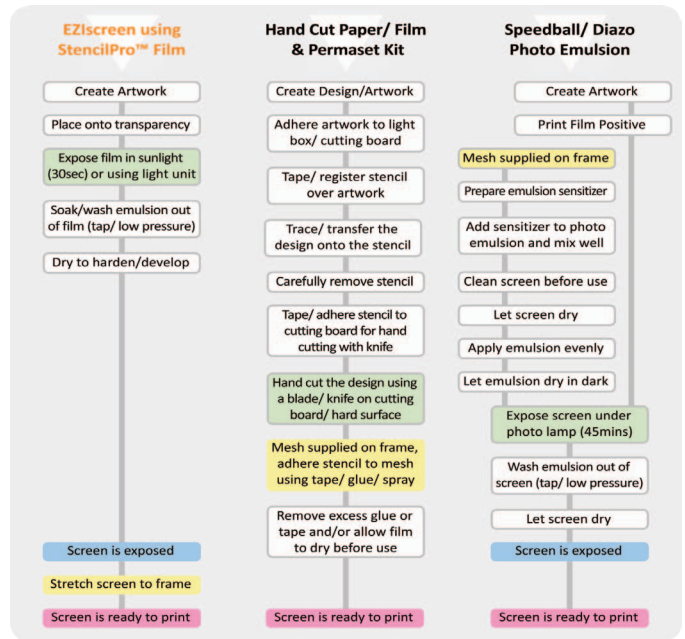

Printing Lessons Included

Learn the common mistakes and how to avoid them to begin printing like a professional straight away. Both our light and dark printing lessons onto white and black fabric to have you printing like a professional.
